

# STAPLES ROAD PRIMARY

December 2025

## December News

End of the term was marked by joyous celebrations and exceptional performances at Staples Road School. We even had a magical visit from Santa Claus, who brought festive cheer and excitement to the whole school! The school community also came together for a range of festivities, including a delicious Christmas Dinner and class parties, concluding with our Staples Road tradition: Christmas songs and a festive dance on the playground. This is always a fantastic moment of togetherness, and a great way to celebrate the start of the holidays.

Our students also showcased their talent in a spectacular line-up of Christmas shows throughout the past two weeks. Caterpillar, Ladybird and Dragonfly Class charmed audiences with their traditional Nativity performances, while Year 1 and Year 2 delighted parents and staff with their brilliant festive Prickly Hay performances. In addition to the in-school productions, our talented KS2 Choir proudly represented the school at St. Mary's Carol Concert, where their beautiful singing added to the festive atmosphere. This flurry of successful events and happy memories rounds off a successful term, and the school wishes all families a very Merry Christmas and a Happy New Year.

**Y12 students from Davenant Foundation School treated us to a brilliant panto**

# Christmas Performances

In addition to all the festivities, our classrooms have been filled with creative curriculum lessons. Year 4 made Nativity scenes based on Christmas in Mexico and also made models to learn about digestion in science. Year 6 have also had fun in science, learning about and testing Isaac Newton's theories of light. Y2 also experienced what being onboard the Titanic was like.

Thank you to one of our parents who came in to teach our Year 3 and 4 children about Hanukkah and the lighting of the Menorah.

Happy Hanukkah to all of our Jewish families.

# 10 Top Tips for Parents and Educators

## ELECTRICAL SAFETY AND DEVICES

Electrical safety is a vital topic for parents and educators, especially with the growing use of devices like smartphones, laptops, and power banks. Electrical fires are a major risk and are the cause of many deaths and injuries each year. There are reportedly nearly 20,000 accidental fires of electrical origin each year in the UK. This guide offers practical advice to help families and schools prevent electrical hazards, and promote safety when using everyday devices.

### 1 CHECK FOR OVERHEATING

Devices such as laptops, tablets, and smartphones can overheat if used for long periods or when charging. Ensure that children don't use devices on soft surfaces like beds or sofas, which can block ventilation. If a device becomes unusually hot, turn it off and unplug it. Overheating can lead to fire hazards if left unchecked.

### 2 INSTALL RESIDUAL CURRENT DEVICES

Ensure that homes and schools are equipped with Residual Current Devices (RCDs). These devices cut off the power if an electrical fault occurs, preventing electric shocks and reducing the risk of fires. RCDs should be tested regularly to ensure they are working properly. More information about RCDs is available from Electrical Safety First.

### 3 AVOID OVERLOADING SOCKETS

Plugging too many devices into one socket can overload the electrical system and cause a fire. In schools and homes, ensure extension leads are not overloaded and never 'daisy chain' multiple extension cords together. Educate children on the dangers of connecting too many devices to a single outlet.

### 4 POWER BANKS: SAFE USE

Power banks are a handy way to charge devices, but they can also pose a risk if misused. Ensure power banks are of high quality and comply with UK safety standards. Teach children never to leave power banks charging unattended, and to avoid placing them under pillows or bedding where they may overheat.

### 5 REGULAR DEVICE INSPECTIONS

Regularly check devices for signs of wear and tear. Frayed charging cables, cracked device casings, or devices that are slow to charge may indicate electrical problems. If any issues are noticed, stop using the device until it can be repaired or replaced by a qualified technician. This proactive approach helps prevent fires caused by faulty devices.

### 6 UNPLUG DEVICES WHEN NOT IN USE

Encourage children and pupils to unplug devices when not in use, particularly overnight. Devices left plugged in unnecessarily can overheat or become fire hazards, especially if left charging unattended for long periods. Simple habits like unplugging can prevent serious incidents.

### 7 USE GENUINE CHARGERS

Always use chargers supplied by the manufacturer or from a reputable retailer. Faulty or counterfeit chargers can cause devices to overheat, short-circuit, or even catch fire. Teach children the importance of avoiding poor-quality chargers, and regularly inspect charging cables for signs of wear or damage. More tips on safe charging can be found at Electrical Safety First.

### 8 WATER & ELECTRICITY DON'T MIX

Teach children that water and electricity are a dangerous combination. Devices should never be used near sinks, bathtubs, or swimming pools. Parents and educators should ensure that any electrical appliances near water sources have proper waterproof casings and are plugged into RCD-protected outlets.

### 9 KEEP DEVICES VENTILATED

Devices need proper ventilation to avoid overheating. Avoid stacking items on top of plugged-in devices like laptops or gaming consoles, and make sure there is enough space around devices to allow for airflow. Proper ventilation helps prevent dangerous heat build-up, reducing the risk of fires.

### 10 SUPERVISE YOUNG CHILDREN

Younger children may not understand the dangers of electricity, so it's important to supervise them when they are using devices. Keep electrical cords out of reach and always remind children never to put objects into electrical outlets.

## Meet Our Expert

James Whelan is an experienced health and safety expert who is a Chartered Member of the Institution of Occupational Safety and Health. He provides services to educational settings as well as many other industries to help them maintain a safe working environment.
